Serial #: _____

Notes: _____

Some film choices or part configurations will require seams or areas that will remain unprinted. Texas Hydrographics (Texas HG) will keep the product's overall appearance in mind when laying out the areas to be processed. The seam placement will be decided by Texas HG, unless noted to do otherwise. The hydrographic process requires the submerging of all parts into water. Texas HG will not be responsible for damage to any parts due to being submerged in water. Firearms and Bows must be disassembled in order to be dipped. If not done by customer, Texas HG will have a 3rd party disassemble at customer's cost. Items will not be re-assembled. Any Warning Labels, including stickers and riveted tags will be removed prior to processing. It is the customer's responsibility to replace all manufacturer's warning labels. By signing below, you hereby authorize Texas HG to process all shipped/delivered parts as specified on this form.

Signature: _____ Date: _____

By emailing, mailing or faxing this form, it will act as your authorization for Texas Hydrographics to begin work. Please contact us with any questions.
